SUMMARY

Computer science undergraduate pursuing software engineering internships. Experience building Java applications, system-level utilities, and end-to-end web-to-backend pipelines. Strong foundation in data structures, file I/O, debugging, Linux environments, and multi-language system integration across academic and project-based work.

TECHNICAL SKILLS

Languages: Java, C, C++, SQL (MySQL), COBOL | **Systems:** Linux, UNIX, Windows, IBM z/OS | **Tools:** Eclipse, VS Code, TSO
Core Concepts: Object-oriented programming, file I/O, batch processing, debugging, system integration, command-line execution, persistent storage

EXPERIENCE

IT Intern

Dec 2025 – Present

Camarda Wealth Advisory Group — Fleming Island, FL

- Diagnosed hardware, software, and network issues across multiple user endpoints in production office environment
- Installed operating system updates and applications across Windows systems, maintaining stable developer and user workstations
- Configured and deployed user devices using standardized setup procedures
- Documented troubleshooting workflows improving repeatability of technical support tasks

PROJECTS

Mortgage Amortization System — COBOL, JCL, HTML, CSS, JavaScript, CGI

- Developed COBOL program calculating mortgage amortization schedules from user inputs
- Built web interface hosted on IBM mainframe, enabling browser-based interaction
- Implemented CGI shell pipeline dynamically generating and executing JCL jobs
- Integrated frontend, shell scripting, batch execution, and backend computation

Employee & Customer Ticket Management System — Java

- Developed Java application managing support tickets across employees and priority levels
- Implemented workload distribution logic balancing ticket assignments
- Persisted application data using CSV-backed storage across executions

Student Grade and Degree Planner — COBOL, JCL, DB2, VSAM, CICS

- Implemented a DB2 table for student grade and course records, working within mainframe storage constraints
- Implemented VSAM KSDS for fast keyed student lookups powering advisor-facing operational snapshots
- Developed CICS transaction gateway routing mainframe reads and writes for student and advisor workflows
- Authored COBOL batch programs and JCL jobs handling prerequisite evaluation, plan generation, and transcript processing

Annuity Calculator — COBOL, JCL, TSO

- Developed COBOL batch program collecting annuity inputs via TSO
- Executed and debugged JCL jobs producing formatted calculation output

EDUCATION

University of North Florida — Jacksonville, FL

Expected May 2027

Bachelor of Science, Computer Science

GPA: 3.51

Dean's List: 2024–2025 Academic Year, Summer 2025, Fall 2025

CERTIFICATIONS

IBM z/OS Mainframe Practitioner — IBM

Architecting Applications with IBM Z — IBM

IBM Z Xplore – All Star — IBM
